ABOUT ME

I am a developer with a passion for what I do. I usually say that if you do what you love, you live on vacation. So I am always improving what I already know and trying to learn new things that help me to be a better developer, more creative, complete and focused on the most efficient and current solutions in the industry.

For the last year I have been studying development through the JavaScript stack focusing on ReactJS and React native technologies for frontend web and mobile development, and NodeJS for backend. Below this resume I leave some other technologies that I use and study.

EDUCATION

Estácio de Sá University

January 2022 - Current

System Analysis and Development

The role of the System Analyst and Developer is to analyze, design, document, specify, test, deploy, and maintain computer systems and software
