ABOUT ME

I'm 23 years old and I'm in the 3rd period of systems analysis and development. I currently carry out small and medium-sized projects for people and companies in a team or individual freelance mode, these projects being integrated with React, NodeJS and React Native. I started in software development at the beginning of the pandemic where I found opportunities to develop my skills and passions within the technology field.

EDUCATION

Estácio de Sá University   January 2022 - Current

System Analysis and Development

The role of the System Analyst and Developer is to analyze, design, document, specify, test, deploy, and maintain computer systems and software.
